

SWE573

* Create with real data
→ makes it more relatable

→ how to handle links

username -> store, about
example tags
links
video example

Outside resource

→ spaces : collective
→ group

→ questions = DISCORD

→ get mindspace of customer

→ ^{shared} spaces → community
 ↙ ↘
 ↳ admin ↓
 private, public
anybody ~~spaces~~
can add ↳ member → can contribute
 ↳ guest → contribute

→ public/private different
for spaces

→ tag, space → can use both
first post, then space → every property

→ space posts → collective

→ search within the space

→ THINK SCENARIO

Infrastructure → 2FA

Django → can use admin panel
but customize

↳ Full stack

2 things: BE MINDFUL

→ Good practice of s. development

↳ until now, planning

→ issue

→ reqs

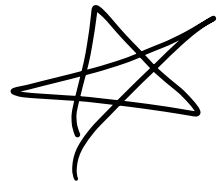

→ mockup

→ specs

→ test

→

UPDATE REQS

APPS VS REQS

Link posts → go to the link
don't store data
if it is possible
show what is inside

01.11.2022 SWE 573

- Categorize reqs
- user reqs, functional, non-functional
- save only url not the content

Functional: who and how to use, user, admin
user can do this by this

Non-functional: performance, security, optimization
usability, accessibility

Explain vocabularies in the glossary

memory: uri, name ---
edit, delete, post

- 1- Terminology
- 2- Reqs
- 3- User Story
- 4- Mock

08.11.2022

- reqs should have ids
- func reqs: user, system
- create branches,
 - commits should be atomic
 -

22.11.2022

- For the deleted tweets check the link first then throw exception
- schema.org?
- Event? → date, location, location-url
- Collaborative filtering
 - Bookmark → importance level, category, title of collection
- To do list?

- Forward the links,

→ Scenario: add link to reading list
then read it

I want to act on it → share, comment
repost with comment?

- Why use this app?

→ Easy to use

- How to see if app is success?

→ No of active users

→ Request per day

→ Like, bookmark, comment

→ Following

→ Screen time (but needs consent)

- AWS → alpha version

TO DO

FOR THIS WEEK:

- Search

- Test

- Bookmark

- Like, rating

- Change Tag model
m2m

- Change FE (Galler)

-

• 29.11.2022 •

⇒ Register → Don't show everything on the feed page → Personalise

⇒ Bookmarks

13.12.2022

→ Turgut'un Github'ı iyi stalk → link preview
Erolp NICE

→ Follow topic?

↓
@n2 sayfa

→ Notification → Follow + Comment

→ URL title (anchor title)

↳ Go to website button

→ Edit, delete post

→ Post sorting order by creation date

→ Timezone?

→ Pagination

→ Public, private, default

→ Draft, public

→ Password security

AWS secret manager?
